SLEE: Equity Scholarships	Engagement	Genevieve Bertone	36	69	1	\$9,200	100%

Please type in your responses to the below questions within the space provided.

Summarize your projects' overall goals and/or intentions for students.

The Equity Scholarship is a partnership between the Student Equity department and the Student Financial Services office. It was an effort to combine individual book voucher programs for special populations into a more institutional project that could be more equitably and legally distributed. Working with the Scholarships office helped avoid Federal Financial Aid compliance issues and also provided the ability to rank applicants by unmet financial need. The scholarship is meant to have an easy on-ramp with accessible criteria and simplified application process. However, there is designated criteria meant to closely tie the project to target populations. Students must be in the target population student group, have completed the student success steps, and be in good academic standing. These applicants are then ranked by financial need.

Please describe the specific activities supported by SEA funds.

Scholarship recipients received \$200 in credit from the SRJC bookstore to purchase items such as textbooks, school supplies, uniforms, computer software, and materials for specific programs. Students received half of the award in fall and half of the award in spring. All awardees received their fall disbursement. For Spring disbursement, students were required to have attended a student success workshop and / or meet with a student success coach during the fall semester as part of the award agreement.

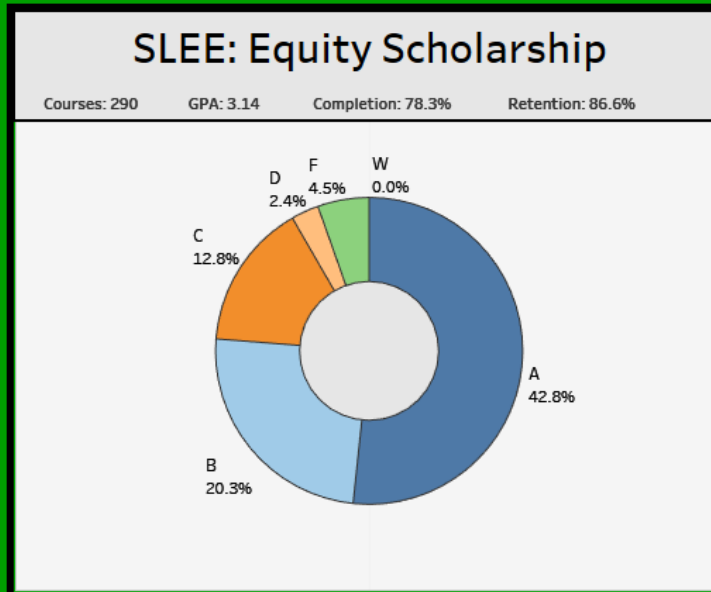

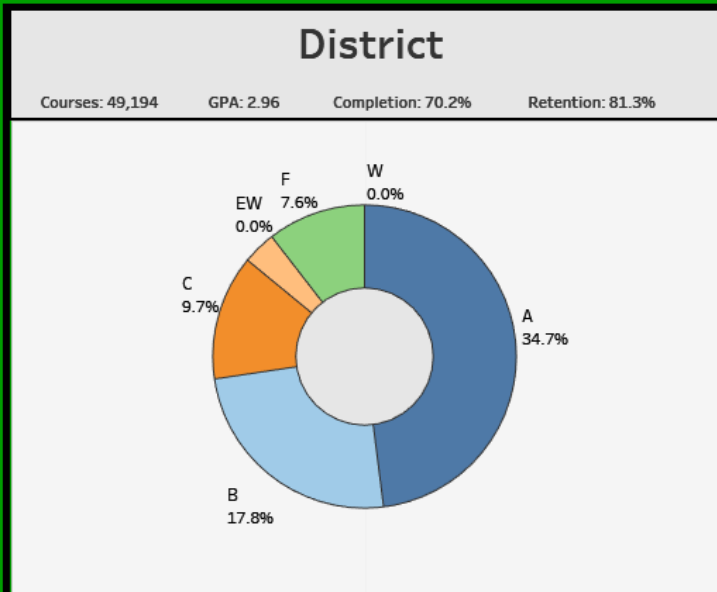

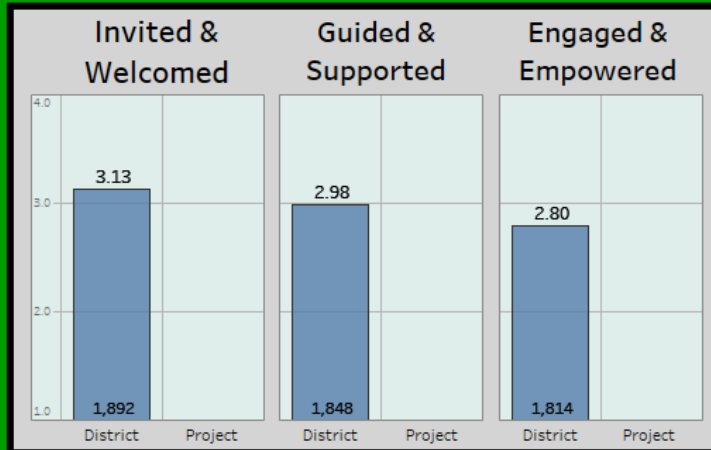

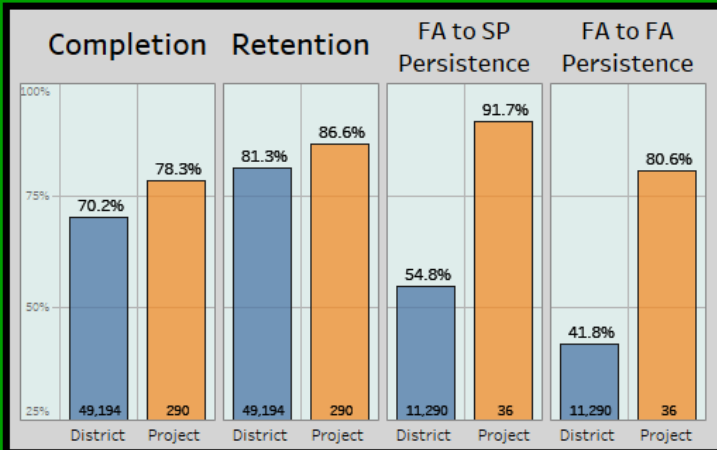

Share any highlights or achievements your group had during the year – refer to the following data if applicable.

The project outcomes demonstrate that students in this project had an increase in their course success by 8.1% as compared to the district. The course retention is also greater than the district comparison +5.3%. Additionally, fall to spring and fall to fall persistence are much greater than that of students who did not receive this economic assistance.

It is important to recognize that many of our target populations; Low Income, DSPS, 1st Gen. and students of color who received this assistance showed much greater outcomes than these student groups that did not.
